

## Adaptive Digital Predistortion for Power Amplifier Linearization

Filesize: 1.27 MB

### **Reviews**

*Without doubt, this is actually the greatest function by any article writer. It is among the most amazing publication i have got read. Its been printed in an exceedingly basic way in fact it is simply after i finished reading through this publication where in fact changed me, change the way i believe.*

*(Arielle Ledner)*

## ADAPTIVE DIGITAL PREDISTORTION FOR POWER AMPLIFIER LINEARIZATION

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The new radio communication systems move toward the use of non-constant envelopes modulations and toward the application of spread spectrum techniques. The modulated output envelopes of such signals are strongly dynamic and so, the influence of the nonlinearities of the transmitters are not negligible. A solution consists of correcting the amplifier while associating with it a linearization device so that the whole amplifier-linearizer system behaves in a quasi-linear manner up to practically the power of saturation. The main part is dedicated to the study of a new adaptive digital predistorter that can be applied to wide band signals used in third generation systems. After a state of the art of the predistortion system a new technique or improvement of adaptation techniques are proposed and estimated by simulation. The influence of the main sources of imperfections on the system is analyzed. The work also compares the complexity of the different approaches of predistortion by LUT, polynomial predistortion without memory or with memory. | Format: Paperback | Language/Sprache: english | 204 pp.
