A FRAMEWORK FOR INCLUDING THE VALUE OF TIME IN DESIGN-FOR-MANUFACTURING DECISION MAKING (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Framework for Including the Value of Time in Design-for-Manufacturing Decision Making Examples of design rules are: minimize the number of discrete parts in the design, minimize the number of unique part numbers in the design, eliminate adjustments at final assembly and eliminate fasteners [baetz87, Trucks87]. Some of the rules are more narrowly focused on part features and may, for example, specify that holes punched in sheet metal parts should be located at least two hole diameters away from the edge of a part. The rules are a codification of production expertise into a concise form and are easy to communicate. There is significant anecdotal evidence that the use of these guidelines is effective in producing low-cost and high-quality designs [gager86].
