

Stepping Motors: A Guide to Theory and Practice (Control Engineering)

Filesize: 5.93 MB

Reviews

A whole new e book with an all new point of view. It is one of the most incredible book i actually have go through. I am easily could possibly get a enjoyment of reading through a written book.
(Nathanael Treutel)

STEPPING MOTORS: A GUIDE TO THEORY AND PRACTICE (CONTROL ENGINEERING)

Institution of Electrical Engineers. Paperback. Condition: New. 170 pages. Stepping motor technology is well established and used for motion control, most notably for computer peripherals but also wherever digital control is employed. The book provides an introductory text which will enable the reader to both appreciate the essential characteristics of stepping motor systems and understand how these characteristics are being exploited in the continuing development of new motors, drives and controllers. A basic theoretical approach relating to the more significant aspects of performance is presented, although it is assumed throughout that the reader has no previous experience of electrical machines and is primarily interested in the applications of stepping motors. Paul Acarnleys outstanding reference book is widely known and used, and this, the 4th edition, has been significantly updated to include many new applications that have emerged since the previous edition was published. Coverage includes: drive circuits, accurate load positioning, static torque characteristics, multi-step operation, torquespeed characteristics, high-speed operation, open-loop control, closed-loop control and microprocessor-based stepping motor systems. Also available: Temperature Measurement and Control - ISBN 0863411118Variable Structure Systems: from principles to implementation - ISBN 0863413501The Institution of Engineering and Technology is one of the worlds leading professional societies for the engineering and technology community. The IET publishes more than 100 new titles every year; a rich mix of books, journals and magazines with a back catalogue of more than 350 books in 18 different subject areas including: -Power and Energy -Renewable Energy -Radar, Sonar and Navigation -Electromagnetics -Electrical Measurement -History of Technology -Technology Management This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
