Scientific Publishers, 2008. Hardcover. Condition: New. PESTS OF FOREST IMPORTANCE AND THEIR MANAGEMENT is a unique book comprising all the major components of a sylvatic ecosystem from the standpoint of pests of economic importance and their control using both conventional and modern applications. The book is a compilation of 15 specialist articles woven around the central theme of the objective envisaging a variety of forest arthropod pests including both insects and arachnids as well as vertebrates. In addition, the book comprises a special dedication chapter on the biography and (entomological) bibliography of Professor Dr P.K. Sen-Sarma, possibly the most updated and authoritative account ever penned, which is amongst the most stimulating contributions likely to profusely ignite the minds of young and enthusiastic researchers in the country engaged in forest entomology. The book, written in a lucid and clearly comprehensible style, consists of closely knitted articles on taxonomy, biology, economic forestry, ecology, biogeography, prevention and control of the forest products from the pest attack, which all make an interesting reading and will hopefully serve a good purpose of a reference work for both a serious researcher and the amateur naïve enthusiast. The book is dedicated to the fond memory of Prof. Dr P.K. Sen-Sarma, the doyen of forest entomology and patron of Indian Isopterology, and is expected to enthuse a large number of scientists, research scholars and academicians across the world to take up researches in forest entomology. Contents: 1. Prof. P. K. Sen-Sarma, Ph.D., FNAsc. FAsc., FESI, FIAWSc, FNAAS - A Termitologist and Forest Entomologist: Biography and Contributions (1929- 2002); 2. Termites in Dikes of Northern Vietnam; 3. Biological Observations on some Wood-infesting Termites (Isoptera : Insecta) of the Andaman and Nicobar Islands, India; 4 Biosystematics and Functional Diversity of Trichogramma; 5. Two new species of Genus Neococcidencyrtus Compere (Hymenoptera:...
